

Fulcrum Therapeutics™ Reports Inducement Grant Under Nasdaq Listing Rule 5635(c)(4)

September 10, 2021 at 7:00 AM EDT

CAMBRIDGE, Mass., Sept. 10, 2021 (GLOBE NEWSWIRE) -- [Fulcrum Therapeutics, Inc.](#) (Nasdaq: FULC), a clinical-stage biopharmaceutical company focused on improving the lives of patients with genetically defined rare diseases, today announced the grant of an inducement award outside of the Company's 2019 Stock Incentive Plan to Mel Hayes, the Company's newly appointed Chief Commercial Officer. The grant was approved by the Compensation Committee on August 4, 2021 as an inducement material to the employee entering into employment with the Company in accordance with Nasdaq Listing Rule 5635(c)(4).

The inducement grant consisted of a nonstatutory option to purchase up to 140,000 shares of common stock. The option has an exercise price of \$28.49 per share, the closing price per share of the Company's common stock as reported by Nasdaq on September 7, 2021. The option has a ten-year term and vests over four years, with 25% of the original number of shares vesting on the first anniversary of the employee's start date and an additional 6.25% of the shares vesting in equal quarterly installments over the twelve successive quarters following the first anniversary, subject to such employee's continued service with the Company through the applicable vesting dates.

About Fulcrum Therapeutics

Fulcrum Therapeutics is a clinical-stage biopharmaceutical company focused on improving the lives of patients with genetically defined rare diseases in areas of high unmet medical need. Fulcrum's proprietary product engine, FulcrumSeek™, identifies drug targets which can modulate gene expression to treat the known root cause of gene mis-expression. Fulcrum has advanced losmapimod to Phase 2 clinical development for the treatment of facioscapulohumeral muscular dystrophy (FSHD). Fulcrum has also advanced FTX-6058, a small molecule designed to increase expression of fetal hemoglobin for the treatment of sickle cell disease and beta-thalassemia, into Phase 1 clinical development.
